

## 2010 Organization for High Schools

SNRSEF **Project Categories** - View list at this website.

Schools are required to submit to SNRSEF 1) **School Registration** and 2) **Registration of High School Students**; **ON-LINE REGISTRATION** will open fall 2010 at <http://sciences.unlv.edu/engineeringfair/2009/hs.html>.

All **required project documents** (Intel) for students must be submitted to the **SNRSEF IRB** before students begin their projects. Any students who have **late** submission of documents will have **5 points deducted from their scores during judging**. Documents that are required can easily be determined by completing the **Intel ISEF Rules Wizard** at [http://www.societyforscience.org/isef/about/rules\\_regulations.asp](http://www.societyforscience.org/isef/about/rules_regulations.asp).

The registrations will not be available on-line after the **deadline**, and **no late off-line submissions** will be accepted. If the school fails to meet the deadlines, the school is responsible for immediately **notifying students** who thought their projects would be submitted to the regional fair. If students show up at the fair without prior school/student registration or timely submission of documents, they will not be allowed to compete in the fair.
